

# COMPANY PROFILE

---

APPLICATION DEVELOPMENT | REVENUE OPTIMIZATION | BUSINESS PROCESS EFFICIENCY

# ABOUT THE COMPANY

Inteliworx Technologies is a technology firm with core competence in revenue systems optimization and business process efficiency.

Our extensive work with internal revenue services on organizational transformation and modernization has made us develop expertise in customizing solutions for public sector revenue generating agencies.

The company also develops software applications for customers using proprietary and open-source tools and platforms.

Inteliworx Technologies was established in 2009 and commenced business in 2010.

## Strategic Intent Statement

To make **DEALING** with government transparent and as simple as A, B, C...

# CORE VALUES

## Continuous Learning

Cultivate an organization that is dynamic and embraces transformation, adapts to trends and is receptive to signals in our business environment.

## Teamwork

We shall continually promote and nurture commitments for support and trust among our employees to enable them share their individual know-how (tacit knowledge) and expertise across all facets of our operations so that we bring the best of Inteliorx Technologies to our clients.

## Creativity and Innovation

Promote the immersion of our people in new and challenging environments so as to learn, adapt and achieve by encouraging originality, using analogies, boldly confronting ingrained orthodoxies and overcoming constraints.

## Professional, but Personal

Continually ensure that our employees are skilled and resourced, are working within an innovation-driven framework, connecting and sharing with colleagues and clients in the delivery of results.

## Customer Focused and Service Excellence

We will consistently imbibe and follow best management practices by entrenching problem driven approaches into client relationships and service delivery frameworks in order to foster long term and strong partnerships with our clients. We will be committed to clients' total satisfaction in everything we do, by partnering to shape their aspirations and consistently deliver value that exceeds their expectations.

# FLAGSHIP PRODUCTS

Revmate our integrated tax administration system is a platform designed to streamline and automate tax operations of an internal revenue service. Revmate handles Taxpayer Registration, Personal Income Tax, Collections, With-holding Tax, Stamp Duties and Capital Gains Tax. It comprises of modular applications that adequately function independently and/or interface seamlessly together to automate primary aspects of tax administration.

Cashworx is a centralized revenue collection system that allows government to track or monitor and collect revenues through a streamlined process. Cashworx will also facilitate the government's ability to create a policy structure supported by technology that will enable this 360° view of internal revenues. As a result, the government can collect more, collect faster, and do so at the lowest cost. The system uses a common identifier such as TIN that could be used to collate, report and collect liabilities efficiently and effectively.
